Could Anyone On This Planet Become A Millionaire With Only \$10,000 Capital And A Simple Easy To Do Light Work From Home?

Yes. We've heard a lot of success stories during 1980 - 1999 about how so many people became millionaires in their MAIL ORDER BUSINESS with less than \$10,000 capital and a some light work input.

Also heard were a lot of success stories between year 2000 to the present year 2025 about how so many people became millionaires in their DOT.COM INTERNET DIGITAL BUSINESS with as little as \$5,000 - \$500,000 capital

Let's be realistic, With DOT.COM INTERNET DIGITAL BUSINESS, some will need at least \$500,000 - \$5,000,000 or even more in order to strick it big and be making \$millions if they were starting from scratch/fresh.

For example, facebook.com got its own started with \$500,000 loan/investment from Paypal, private investor, lender while twitter.com (now called X) got it started first with a \$35 million loan/investment from one private lender and another \$100 million investment from another private lender.

Did you remember that Amazon.com started its own with **\$500 million** of investors money **from stock exchange** public fund but did not make profit in its first 7 years until it rebranded?

Note: Most of the people who've made \$millions with less than \$10,000 Capital did not start from the scatch on thier own, instead they worked for or invested into an already established but young growing DOT.COM INTERNET DIGITAL BUSINESS.

For example, Arkansas State, Georgia State and State of Mississippi were merged to form 1 Territory while PA State has over 12 million population and it is 1 Territory on its own

Also, we divided one BIG State into 2 or 3 to form 2 or 3 territories. For example, California State has over 36 million population. This would accommodate 3 territorial representative for us while Florida which has about 24 million population will accommodate 2 Territorial Representatives for us.

We have 24 Territories for USA & Canada. **BETTER THAN HAVING A FRANCHISE**
